Very nice game. Well worth the price.. Wonky. Mystifying. Broken. In a word, terrible.. A mixture of rhythm, bullet hell and quirky characters. I can definitely recommend it for the low price and a fun experience.. This game is a time waster. A 5-10 minute game to play at a time. The object of the game is very simple, get to the destination so that you can survive the Zombie apocalypse. You do this by driving different kinds of vehicles across a wasteland and enhancing them with better engine, transmission, tires and other things, to make your ride better and more durable.

Its a fun game but if you play it for longer than 5-10 minutes you will find it extremely repetitive. But for the amount of time I play it every day its a very casual game and its fun. The vehicles are funny and the attachments you can add make zombie bashing a lot of fun.

Something very positive the developers should add at some point is Workshop support so people can add their own weapons and vehicles and or maps. Would add more to the game.

Overall I give the game a 5/5.. Great Game!!!!. Im usually not a big fan of dualstick shmups but this deserves some words Challenging gameplay, good learning curve, skills, dual stick (xbox360 work perfect) left stick steer right stick shoot switchable for left handers ,some classic gameplay like asteroids, gyruus mixed with new elements + skilltree, demands for more gametime here :)

The sound is also good, Tec\Beat\Effects

Gfx is good for this kind of game

Horrible game. Puzzles makes little to no sense after the first room.. The game comes out as a Lovecraftian horror game with stealth and platforming game.

It is in early development stages but It has huge potential to evolve into an amazing game. It has a noir taste all around but with Lovecraftian touches

Developers seem to care for the opinion of the players too so it feels like we could have a great Lovecraftian game if they managed to pull it .. A very good adventure, Raymond Chandler would recommend it!. Could be a bad game for your smartphone.. It is a very beautiful game that shows things that were not in the anime, but also some dialogues from the anime. As soon as I started the game I had already started crying that I reviewed Asako :)

It's a bit sad that you can not take the entire Grisaia collection at once, because all the 11 games in total are almost 200 euros, but they are worth more than just 200 euros for me.. Very epic looking costumes lady gaga and bazooka skirt. Tic-Toc-Tower is so addicting, when i started playing this game i thought: well this seems fun. and after a while, i started getting better highscores that i needed to break everytime i set one. i just couldn't stop xd. so yeah, i like playing this game and i would recommend to whoever is reading this. When you look at the price of the game you are like "yea i am gona buy it and never gona play it" but it is actually really good for that price. The style of the game was so gorgeous. It feels weird cuz of the graphics, music, ambient but it is really good.
